

Camera video (with laser device) + remote control using ANT+

Produit : Electronic / Measuring devices

Legal manager : DLUBALA JULIEN

Updated at : 10/07/2025 17:19:50

Downloaded at : 27/03/2026 13:41:14

INDIA

Product's definition

Category

In which category the product is classified ?

It is classified in the category of 'Audio, Video and Multimedia Systems and Equipment'.

It is regulated under IS 616 (2010): Audio, Video and Similar Electronic Apparatus - Safety Requirements [LITD 7: Audio, Video and Multimedia Systems and Equipment]

The products falling under this category are also governed by other regulations basis their components -

1. ANT+ is governed by ETA certifications
2. Laser pointers/remotes are governed by WPC certifications
3. Cameras are governed by BIS standards.

Definition

What is the exact definition of the product ?

And if it exists, what is the interpretation of the authorities regarding it ?

No exact definition is provided under law.

Comments

Comments

Labelling

Language

In which language must the information on the product or on the packaging be indicated? If English is sufficient please indicate NA.

Note: Generally All the particulars and Labelling are made in English Language.

By The Legal Metrology (Packaged Commodities) Rules, 2011

Chapter II Provisions Applicable to Packages Intended for Retail Sale:

9. Manner in which declaration shall be made

4) The particulars of the declarations required to be specified under this rule on a package shall either be in Hindi in Devanagiri script or in English; Provided...

Mandatory labelling on product

What are the mandatory labelling on the product ?

Refer to question of "Mandatory Standards" in the Technical Section.

Mandatory labelling on packaging

What are the mandatory labelling on the packaging ?

Refer to question of "Mandatory Standards" in the Technical Section.

By The Legal Metrology (Packaged Commodities) Rules, 2011

Mandatory labelling on the instructions manual

What are the mandatory labelling on the instructions manual (if one is required) ?
In which format, do we have to deliver the instruction manual to our customers ?

Refer to question of "Mandatory Standards" in the Technical Section.

Warnings - General ones

Are general warnings required ? If yes, which ones ?

Refer to question of "Mandatory Standards" in the Technical Section.

Warnings - Specific ones

Are specific warnings required ? If yes which ones ?

Refer to question of "Mandatory Standards" in the Technical Section.

Target Age

Is there any target age applicable? If so, does it have to be indicated and in which form?

Not Applicable

Sanctions / Fines

What are the sanctions / fines in case of non conformity ?

By The Legal Metrology (Packaged Commodities) Rules, 2011

Chapter II Provisions Applicable to Packages Intended for Retail Sale:

20. Action to be taken on completion of inspection of packages at the premises of the manufacturer or the packer:- (1) If it appears from the report referred to in sub-rule (3) of rule 19 that,-

(a) the statistical average of the net quantity contained in the packages drawn as samples under that rule is lesser than the quantity declared on the packages or on the labels affixed thereto, or any such package shows an error in deficiency greater than the maximum permissible error, or

(b) any such package does not bear thereon or on label affixed thereto the declarations to be made under these rules, the Director, Controller or any Legal Metrology Officer shall take action as given below, namely:-

(i) seize the packages drawn by him as samples and shall take adequate steps for the safe custody of seized packages until they are produced in the appropriate court as evidence;

(ii) based on the evidence initiate action for violations of the provisions of the Act and these rules:

Provided that no such action shall be taken if fresh tests are carried out under sub-rule (4) of rule 19, but if after such fresh tests any error or omission as is referred to in this sub-rule is detected, the Director, Controller or any Legal Metrology Officer shall take appropriate action as specified in this sub-rule in accordance with the provisions of the Act against the manufacturer or, as the case may be, the packer.

(3) The disposal of the seized packages shall be made in accordance with the provisions of the Code of Criminal Procedure, 1973 (2 of 1974).

Chapter VII GENERAL

32. Penalty for contravention of Rules.-(1) Whoever contravenes the provisions of rules 27 to 31, he shall be punished with fine of four thousand rupees.

(2) Whoever contravenes any other provision of these rules, for the contravention of which no punishment has been provided either in the Act or in the rules, he shall be punished with fine of two thousand rupees.

By The Legal Metrology (Packaged Commodities) Rules, 2011

Chapter II Provisions Applicable to Packages Intended for Retail Sale:

18. Provisions relating to wholesale dealer and retail dealers: (Refer to authority attached)

19. Inspection of quantity and error in packages at the premises of the manufacturer or packer:- (Refer to authority attached)

21. Inspection of quantity and error in packages at the premises of the wholesale dealer or retail dealer :- (Refer to authority attached)

23. Deceptive packages to be repacked or in default to be seized: (Refer to authority attached)

Chapter IV EXEMPTIONS

26. Exemption in respect of certain packages: - Nothing contained in these rules shall apply to any package containing a commodity if-

(a) the net weight or measurement of the commodity is ten gram or ten milliliter or less, if sold by weight or measurement.(**)

Chapter VI REGISTRATION OF MANUFACTURERS, PACKERS AND IMPORTERS

27. Registration of manufacturers, Packers and importers :(Refer to authority attached)

28. Registration of shorter address permissible :.. (Refer to authority attached)

29. Registration of manufacturers and packers, etc.: .. (Refer to authority attached)

Chapter VII GENERAL

31. (1) Any advertisement mentioning the retail ale price of the pre-packaged commodity shall contain a declaration as to the net quantity or number of the commodity contained in the package.

(2) The font size of the net quantity in the advertisement shall be same as that of retail sale price.

30. Compilation of lists of manufacturers or packers and their circulation...

33. Repeal and savings ...

Environment

Recycling - Eco taxes

Which regulations concerning ecodesign and recycling apply to this product? Are there any ecotaxes applicable to this category of product?

Refer to question of “Mandatory Standards” in the Technical Section.

Labelling

What are the mandatory labellings to put on the product or on the packaging regarding the environmental rules ?

Not Applicable

Technical rules / Standards

General safety requirements

What are the general safety requirements ? Does a risk assessment have to be conducted ? If yes, does it concern specific risk ?

Refer to question of “Mandatory Standards” in the Technical Section.

Mandatory or voluntary standards

Are there some mandatory or voluntary standards applicable ? If yes, which ones ?

Please indicate the reference of the applicable standards

IS 616 (2010): Audio, Video and Similar Electronic Apparatus - Safety Requirements [LITD 7: Audio, Video and Multimedia Systems and Equipment]

INTRODUCTION

Principles of safety

General

This introduction is intended to provide an appreciation of the principles on which the requirements of this standard are based. Such an understanding is essential in order that safe apparatus can be designed and manufactured.

The requirements of this standard are intended to provide protection to persons as well as to the surroundings of the apparatus.

Attention is drawn to the principle that the requirements, which are standardized, are the minimum considered necessary to establish a satisfactory level of safety.

Further development in techniques and technologies may entail the need for future modification of this standard.

NOTE : The expression "protection to the surroundings of the apparatus" implies that this protection should also include protection of the natural environment in which the apparatus is intended to be used, taking into account the life cycle of the apparatus, i.e. manufacturing; use, maintenance, disposal and possible end-of-life recycling of parts of the apparatus.

Hazards

The application of this standard is intended to prevent injury or damage due to the following hazards:

- electric shock;
- excessive temperatures;
- radiation;
- implosion;
- mechanical hazards;
- fire.

Electric shock

Electric shock is due to current passing through the human body. Currents of the order of a milliampere can cause a reaction in persons in good health and may cause secondary risks due to involuntary reaction. Higher currents can have more damaging effects. Voltages below certain limits are generally regarded as not dangerous under specified conditions. In order to provide protection against the possibility of higher voltages appearing on parts which may be touched or handled, such parts are either earthed or adequately insulated.

For parts which can be touched, two levels of protection are normally provided to prevent electric shock caused by a fault. Thus a single fault and any consequential faults will not create a hazard. The provision of additional protective measures, such as supplementary insulation or protective earthing, is not considered a substitute for, or a relief from, properly designed basic insulation.

Cause	Prevention
Contacts with parts normally at hazardous voltage.	Prevent access to parts at hazardous voltage by fixed or locked covers, interlocks. etc. Discharge capacitors at hazardous voltages.
Breakdown of insulation between parts normally at hazardous voltage and " accessible parts.	Either use double or reinforced insulation between parts normally at hazardous voltages and accessible parts so that breakdown is not likely to occur, or connect accessible conductive parts to protective earth so that the voltage which can develop is limited to a safe value. The insulations shall have adequate mechanical and electrical strength.
Breakdown of insulation between parts normally at hazardous voltage and circuits normally at non-hazardous voltages. there- by putting accessible parts and terminals at hazardous voltage.	Segregate hazardous and non-hazardous voltage circuits either by double or reinforced insulation so that breakdown is not likely to occur, or by a protective earthed screen, or connect the circuit normally at non-hazardous voltage to protective earth, so that the voltage which can develop is limited to a safe value.
Touch current from parts at hazardous voltage through the human body. (Touch current can include current due to RFI filter components connected between mains supply circuits and accessible parts or terminals.)	Limit touch current to a safe value or provide a protective earthing connection to the accessible parts.

Excessive temperatures

Requirements are included to prevent injury due to excessive temperatures of accessible parts, to prevent damaging of insulation due to excessive internal temperatures, and to prevent mechanical instability due to excessive temperatures developed inside the apparatus.

Radiation

Requirements are included to prevent injury due to excessive energy levels of ionizing and laser radiation, for example by limiting the radiation to non-hazardous values.

Implosion

Requirements are included to prevent injury due to implosion of picture tubes.

Mechanical hazards

Requirements are included to ensure that the apparatus and its parts have adequate mechanical strength and stability, to avoid the presence of sharp edges and to provide guarding or interlocking of dangerous moving parts.

Fire

A fire can result from

- overloads;
- component failure;
- insulation breakdown;
- bad connections;
- arcing.

Requirements are included to prevent any fire which originates within the apparatus from spreading beyond the immediate vicinity of the source of the fire or from causing damage to the surroundings of the apparatus.

The following preventive measures are recommended:

- the use of suitable components and subassemblies;
- the avoidance of excessive temperatures which might cause ignition under normal or fault conditions;
- the use of measures to eliminate potential ignition sources such as inadequate contacts, bad connections, interruptions;
- the limitation of the quantity of combustible material used;
- the control of the position of combustible materials in relation to potential ignition sources;
- the use of materials with high resistance to fire in the vicinity of potential ignition sources;
- the use of encapsulation or barriers to limit the spread of fire within the apparatus;

- the use of suitable fire retardant materials for the enclosure.

1 General

1.1 Scope

1.1.1 This International Safety Standard applies to electronic apparatus designed to be fed from the MAINS, from a SUPPLY APPARATUS, from batteries or from REMOTE POWER FEEDING and intended for reception, generation, recording or reproduction respectively of audio, video and associated signals. It also applies to apparatus designed to be used exclusively in combination with the above-mentioned apparatus.

This standard primarily concerns apparatus intended for household and similar general use but which may also be used in places of public assembly such as schools, theatres, places of worship and the workplace. PROFESSIONAL APPARATUS intended for use as described above is also covered unless falling specifically within the scope of other standards.

This standard concerns only safety aspects of the above apparatus; it does not concern other matters, such as style or performance.

This standard applies to the above-mentioned apparatus, if designed to be connected to the TELECOMMUNICATION NETWORK or similar network, for example by means of an integrated modem.

Some examples of apparatus within the scope of this standard are:

- receiving apparatus and amplifiers for sound and/or vision;
- independent LOAD TRANSDUCERS and SOURCE TRANSDUCERS;
- SUPPLY APPARATUS intended to supply other apparatus covered by the scope of this standard;
- ELECTRONIC MUSICAL INSTRUMENTS, and electronic accessories such as rhythm generators, tone generators, music tuners and the like for use with electronic or non-electronic musical instruments;
- audio and/or video educational apparatus;
- video projectors;

NOTE 1 Film projectors, slide projectors, overhead projectors are covered by IEC 60335-2-56

- video cameras and video monitors;
- video games and flipper games;

NOTE 2 Video and flipper games for commercial use are covered by IEC 60335-2-82

- juke boxes;
- electronic gaming and scoring machines;

NOTE 3 Electronic gaming and scoring machines for commercial use are covered by IEC 60335-2-82

- teletext equipment;
- record and optical disc players;
- tape and optical disc recorders;
- antenna signal converters and amplifiers;
- antenna positioners;
- Citizen's Band apparatus;
- apparatus for IMAGERY;
- electronic light effect apparatus;
- apparatus for use in alarm systems;
- intercommunication apparatus, using low voltage MAINS as the transmission medium;
- cable head-end receivers;
- multimedia apparatus;

NOTE 4 The requirements of IEC 60950 may also be used to meet the requirements for safety of multi media apparatus (see also IEC Guide 112)

- professional general use amplifiers, record or disc players, tape players, recorders, and public address systems;
- professional sound/video systems;
- electronic flash apparatus for photographic purposes (see Annex L).

1.1.2 This standard applies to apparatus with a RATED SUPPLY VOLTAGE not exceeding

- 250 V a.c. single phase or d.c. supply;
- 433 V a.c. in the case of apparatus for connection to a supply other than single-phase.

1.1.3 This standard applies to apparatus for use at altitudes not exceeding 2 000 m above sea level, primarily in dry locations and in regions with moderate or tropical climates.

For apparatus with protection against splashing water, additional requirements are given in annex A.

For apparatus to be connected to TELECOMMUNICATION NETWORKS, additional requirements are given in annex B.

For apparatus intended to be used in vehicles, ships or aircraft, or at altitudes exceeding 2 000 m above sea level, additional requirements may be necessary.

NOTE See Table A.2 of IEC 60664-1.

Requirements, additional to those specified in this standard, may be necessary for apparatus intended for special conditions of use.

1.1.4 For apparatus designed to be fed from the MAINS, this standard applies to apparatus intended to be connected to a MAINS supply with transient overvoltages not exceeding overvoltage category II according to IEC 60664-1.

For apparatus subject to transient overvoltages exceeding those for overvoltage category II, additional protection may be necessary in the MAINS supply of the apparatus.

1.2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

14 Components (Please refer to the PDF File attached)

15 TERMINALS (Please refer to the PDF File attached)

16 External flexible cords (Please refer to the PDF File attached)

17 Electrical connections and mechanical fixings (Please refer to the PDF File attached)

18 Mechanical strength of picture tubes and protection against the effects of implosion (Please refer to the PDF File attached)

19 Stability and mechanical hazards (Please refer to the PDF File attached)

20 Resistance to fire (Please refer to the PDF File attached)

ANNEX A to ANNEX N (Please refer to the PDF File attached)

Physical and mechanicals properties

What are the physical and mechanicals properties required ?

Refer to question of "Mandatory Standards" in the Technical Section.

Electrical aspects

What are requirements regarding electrical aspects ?

Refer to question of "Mandatory Standards" in the Technical Section.

Inflammability

Are there any specific requirements to ensure inflammability?

Refer to question of "Mandatory Standards" in the Technical Section.

Hygiene

What are the rules regarding hygiene ?

Not Applicable

Radioactivity

What are the rules regarding radioactivity ?

Refer to question of "Mandatory Standards" in the Technical Section.

Radiofrequency (2G,3G,4G,5G, Bluetooth, Ant+, GPS, Wifi...)

What are the rules regarding the radiofrequency?

Products making noise

What are the requirements regarding products making noise ?

Not Applicable

Chemicals substances

What are the requirements regarding chemicals substances ? Which ones are forbidden ? Limited ? Do we have to clearly indicate all substances that are in the product, or is the indication of major substances enough?"

Not Applicable

Packaging requirements

Can you please indicate if there are some requirements regarding the packaging of our products (mainly they are in paper, carton, plastic, textile) ? If yes, please explain them.

Not Applicable

Laboratory

In which laboratory can we perform the testing of the product according to the standard?

Please refer to following pdf files uploaded :

Group 1 List of BIS Recognised Laboratories as on 13-11-2019

Group 2 Lab of National Repute and Eminence, Facilities

Sanctions / Fines

What are the sanctions / fines in case of non conformity ?

Not Applicable

Comments

Comments

Certifications / Registrations

Certifications or registrations

Are there some certifications or registrations applicable to the product ?

Voluntary ISI Certificate may be procured.

Laboratory

In case of mandatory certification/ registration that we must follow please precise the name and address of any laboratories where we can conduct them

Please refer to following pdf files uploaded :

Group 1 List of BIS Recognised Laboratories as on 13-11-2019

Group 2 Lab of National Repute and Eminence, Facilities

Comments

Comments

The steps of getting ISI Certificate are as below -:

Step 1 : Confirmation of Product Quality as per concerned IS Standard

- Identification of ISI Standard Code
- Collection of the Testing Sample from applicant
- Testing of sample at our lab
- Issuing the guideline about Non-Conformity, if any
- Issue of Test Report for your reference

Step 2 : Filing of the Application Form

- Arrange the Internal Test Report of product as per test report
- Compiling of all required documents
- Remit the application fees direct to BIS in USD*
- Filling-up the Form-V
- Submission of Application Form with all enclosures
- Get the confirmation about scrutiny of documents by BIS Office

Step 3 : Remittance of Audit Fees & Travelling Expenses for Inspection

- Pay the audit fees for inspection
- Get the confirmation about BIS Inspection Team
- Organize the VISA, Ticket, Lodging & Boarding for visiting team
- Inspection team will visit to Factory for Physical Verification
- Team will verify the Factory Set-up & Quality Control Process
- Team will pick the random sample to be tested in BIS Approved Lab

Step 4 : Organize the Lab Test Report (LTR)

- Select the BIS recognized lab as per guideline of BIS Office
- Provide the sample (picked-up by team) of product to get tested
- Get the test result

Step 5 : Closure of Non-Conformity (if any) and Remit the Official Fees

- Rectify the process of Factory Unit, if inspection team points out
- Submit the proof of rectification done by unit to close non-conformity
- Pay the annual marking fees (annual license fees) to BIS
- Submit the Bank Guarantee to BIS

Step 6 : Get the ISI Marking /Registration Certificate

Conformity documents

Documents

What are the conformity documents ? Can you please list them ?

Not Applicable

For ISI Certificate, refer to comments sections of “Certifications/Registrations”.

Format

Does it exist a specific format for the conformity documents ? If yes, can you please provide us an example in english ?

No Particular Format

Comments

Comments

Importation rules

General rules

What are the general rules in order to import the product ?

Generally, Importers are required to register with the DGFT to obtain an Importer Exporter Code Number (IEC) issued against their Permanent Account Number (PAN), before engaging in EXIM activities. After an IEC has been obtained, the source of items for import must be identified and declared.

IMPORT PROCEDURE

Step1 : File Bill of Entry with Business Identification Number (BIN)

Step 2: Determine rate of duty for clearance from warehouse

Step 3: File requisite documents with customs department

Step 4: Submit import report/ manifest

Step 5: Receive permission to import goods

Documents

What are the required documents ?

Mandatory Documents:

1. Importer Exporter Code issued from the DGFT
2. Bill of Entry
3. Examination Order generated by the EDI system of Customs

Optional Documents depending upon the type of Product being Imported:

1. Certificate of Origin issued by Authorized Person/ Agency at the place of manufacturing/ processing etc. of the food consignment. Certificate of Origin shall contain information on Country of Origin etc. Hence if the consignor is from a different country;
2. Stuffing list, Packing List;
3. Commercial invoice as mentioned in the Bill of Entry (BoE);
4. Bill of Lading as mentioned in the Bill of Entry (BoE) for sea consignment;
5. Air Way Bill as mentioned in the Bill of Entry (BoE) for air consignment;

Time period

In which time period may we obtain the right to import ?

It generally takes 45 to 60 days for completing the overall procedure from import clearance to Product reaching store shelf.

Administration

What is the administration in charge of importations ? Name and address ?

- Directorate General of Foreign Trade
- Central Board of Excise and Customs

Comments

Comments

Inspection of the product

Inspection method

Does it exist an inspection procedure applicable to the product ? If yes, which administration is in charge of ? Can you please describe the procedure ?

Not Applicable

Commercialization rules

Notification / Declaration

What are the general rules in order to comercialize a product ?
Is there a notification / declaration to do ?

Trade license will have to be acquired which is governed by Municipality Act- which will location specific.
Notification is location specific.

Documents

What are the required documents ?

General documents will be required-in relation to establishment of business.

Delay

What is the delay to obtain the right to commercialize ?

Not Applicable

Display in store

Is there some specific rules on the way to display the product in store ?

Not Applicable

Display on internet

Is there some specific mentions to display the product on internet ?

Information to consumers

Do some specific information to have be given to consumers when the product is placed on the market ?

Not Applicable

Comments

Comments

Administration

What is the administration in charge of commercialization ? Name and address ?

Department of Legal Metrology which comes under the Department of Consumer Affairs.

Documents
