CANADA

Product's definition

Category

In which category the product is classified ?

"Consumer Products" under the Canada Consumer Product Safety Act
"Energy-using Product" under the Energy Efficiency Act and Regulations
"Electrical Equipment" under the Canadian Electrical Code

If the product contains batteries (and comes with batteries), these batteries might be considered "dangerous goods" subject to the Transportation of Dangerous Goods Act

Video cameras capable of being used with radiocommunications technology can be classified as a "radio apparatus" under the Radiocommunications Act.

Regulations Cited in this Card:

Canada Consumer Product Safety Act (S.C. 2010, c. 21), <https://laws-lois.justice.gc.ca/eng/acts/c-1.68/>

Energy Efficiency Act (S.C. 1992, c. 36), <https://laws-lois.justice.gc.ca/eng/acts/e-6.4/>

- Energy Efficiency Regulations, 2016 (SOR/2016-311), <https://laws-lois.justice.gc.ca/eng/regulations/SOR-2016-311/index.html>

Transportation of Dangerous Goods Act, 1992, <https://laws-lois.justice.gc.ca/PDF/T-19.01.pdf>
- Transportation of Dangerous Goods Regulations, SOR/2001-286, <https://laws-lois.justice.gc.ca/eng/regulations/sor-2001-286/>

Radiocommunication Act (R.S.C., 1985, c. R-2), <https://laws-lois.justice.gc.ca/eng/acts/r-2/>
- Radiocommunication Regulations (SOR/96-484), <https://laws-lois.justice.gc.ca/eng/regulations/SOR-96-484/index.html>

CSA Standard C22.1 - Canadian Electrical Code, part I

CAN/CSA-C22.2 NO. 0-10 (R2015) - Canadian Electrical Code, part II

Definition

What is the exact definition of the product ?

And if it exists, what is the interpretation of the authorities regarding it ?

Consumer Product

"consumer product" means a product, including its components, parts or accessories, that may reasonably be expected to be obtained by an individual to be used for non-commercial purposes, including for domestic, recreational and sports purposes, and includes its packaging.

Electrical Equipment

Electrical equipment is defined as "any apparatus, appliance, device, fitting, fixture, luminaire, machinery, material, or thing used in or for, or capable of being used in or for, the generation, transformation, transmission, distribution, supply, or utilization of electric power or energy and, without restricting the generality of the foregoing, includes any assemblage or combination of materials or things that is used, or is capable of being used or adapted, to serve or perform any particular purpose or function when connected to an electrical installation, notwithstanding that any of such materials or things may be mechanical, metallic, or non-electric in origin."

Energy Using products

Means products that are prescribed by the Energy Efficiency Regulations. This includes 'compact audio products' and 'video products' under Division 9 of the Energy Efficiency Regulations.

Lasers

According to a Government of Canada document, "laser" is an acronym that stands for "Light Amplification by Stimulated Emission of Radiation." The light beam from a laser is a condensed source of light, usually in the form of a small narrow beam. This document is available at: <http://healthycanadians.gc.ca/security-securite/radiation/devices-dispositifs/consumer-consommateur/laser-eng.php>.

Remote Controls

A remote control that meet the definition of one of the items in the Category I Equipment List will be considered a 'radio apparatus' under the Radiocommunications Act. More information about the technical specifications is needed to make this assessment. PLEASE SEE THE 'Electronic/Measuring Devices - Radio equipment' subcategory for more information.

Dangerous Goods

A product is a dangerous good if it is a prescribed product under the Transportation of Dangerous Goods Regulations. Batteries fall under Class 9 of the Transportation of Dangerous Goods Regulations, and it is understood that the products in this subcategory may come with batteries. If so, see 'Electronic/Measuring Devices - batteries' subcategory.

Radio Equipment

- Radio apparatus, defined as "a device or combination of devices intended for, or capable of being used for, radiocommunication";
- Interference-causing equipment, defined as "any device, machinery or equipment, other than radio apparatus, that causes or is capable of causing - interference to radiocommunication";
- Radio-sensitive equipment, defined as "any device, machinery or equipment, other than radio apparatus, the use or functioning of which is or can be adversely affected by radiocommunication emissions".

If they meet one of the above definitions, it will be subject to the Radiocommunication Regulations, and will be further classified as either Category I or Category II equipment. Whether an item falls in to Category I or Category II is determined based on its technical specifications. The classification is established by the Radiocommunication Regulations.

Comments

Comments

Depending on their composition and functionality, video cameras with lasers and remote controls may be subject to one or more of several legal regimes. First, there are requirements applicable to all Consumer products in Canada (referred

to here as “Consumer products”). There are also requirements applicable to all electrical equipment (referred to here as “Electrical equipment”). There are requirements applicable to items which transmit radio waves (referred to here as “radio or interference-causing equipment”). There are also requirements applicable to items subject to the Energy Efficiency Regulations (referred to here as “Items subject to the Energy Efficiency Regulations”). Finally, there are requirements applicable to lasers (referred to here as “lasers”)

Items will only be subject to the requirements applicable to the category or categories of goods into which they fall. Therefore, for the purposes of this analysis, the requirements applicable to each category have been provided separately.

With regards to products subject to the Energy Efficiency Regulations at the provincial level, see “Electronic/Measuring Devices – Chargers” subcategory.

* Please note, however, that more information regarding the nature, composition, etc. of each specific product would be necessary in order to make a determination as to which category the product falls under and which regulatory regimes apply to the product. Please note that additional regulatory and/or permit requirements may also apply depending on the product's composition, nature, etc. For example, if products come with batteries, they will be considered dangerous goods, and the requirements under the 'Electronic/Measuring Devices - Battery and accumulators' subcategory would apply.

Labelling

Language

In which language must the information on the product or on the packaging be indicated? If English is sufficient please indicate NA.

Mandatory labelling on product

What are the mandatory labelling on the product ?

See General Infos : https://docs.google.com/document/d/1kx_ngCLpSWWq3uj-Cd6W5tuH75yN-VnV/edit.

For practical information see : <https://docs.google.com/document/d/1wyEHX4rnhygCPYlbtvzQFRFdD-KgcUF2bQHEk5-u02O4/edit?tab=t.0>

See 'Electronic/Measuring Devices - Chargers' for energy-using products and electrical products.

See 'Electronic/Measuring Devices - Radio Equipment' for radio equipment.

Mandatory labelling on packaging

What are the mandatory labelling on the packaging ?

See General Infos : https://docs.google.com/document/d/1kx_ngCLpSWWq3uj-Cd6W5tuH75yN-VnV/edit.

For practical information see : <https://docs.google.com/document/d/1wyEHX4rnhygCPYlbtvzQFRFdD-KgcUF2bQHEk5-u02O4/edit?tab=t.0>

See 'Electronic/Measuring Devices - Chargers' for energy-using products and electrical products.

See 'Electronic/Measuring Devices - Radio Equipment' for radio equipment.

Lasers

Though no explicit legal requirement exists to this effect, Health Canada informs consumers that generally, laser labels provide information such as the classification, wavelength (colour) and power of the laser beam (described in milliwatts/mW). They state that labels also warn users not to look directly into the beam and not to look into the laser beam through optical instruments like microscopes, magnifying glass, telescopes or binoculars. The label may also tell the user if the laser beam is visible or invisible.

Examples of warnings provided by Health Canada:

"Laser Radiation
Do not stare into beam
Class 2 Laser Product
Maximum emission < 1mW
Diode: 650nm"

"Danger
Laser Radiation
Avoid Direct Eye Exposure
Maximum output < 5mW
Laser diode: 630nm - 680nm
Class 3R"

Additional Regulations Cited:

Health Canada's publication entitled Hand-held lasers and laser pointers, available at <https://www.canada.ca/en/health-canada/services/health-risks-safety/radiation/everyday-things-emit-radiation/lasers-hand-held-pointers.html>

Mandatory labelling on the instructions manual

What are the mandatory labelling on the instructions manual (if one is required) ?
In which format, do we have to deliver the instruction manual to our customers ?

See General Infos : https://docs.google.com/document/d/1kx_ngCLpSWWq3uj-Cd6W5tuH75yN-VnV/edit

For practical information see : <https://docs.google.com/document/d/1wyEHX4rnhygCPYlbtvzQFRFdD-KgcUF2bQHEk5-u02O4/edit?tab=t.0>

See 'Electronic/Measuring Devices - Chargers' for energy-using products and electrical products.

See 'Electronic/Measuring Devices - Radio Equipment' for radio equipment.

Warnings - General ones

Are general warnings required ? If yes, which ones ?

See General Infos : https://docs.google.com/document/d/12FUtlolsHCK_c79pKmKcE6vTSH4z563/edit?usp=sharing&ouid=108158560944877852516&rtpof=true&sd=true

For practical information see : <https://docs.google.com/document/d/1wyEHX4rnhygCPYlbtvzQFRFdD-KgcUF2bQHEk5-u02O4/edit?tab=t.0>

See "Electronic/Measuring Devices - Chargers" subcategory.

See 'Electronic/Measuring Devices - Radio Equipment' for radio equipment.

Warnings - Specific ones

Are specific warnings required ? If yes which ones ?

Though no explicit requirement exists in this regard, Health Canada, informs consumers that lasers generally warn users not to look directly into the beam and not to look into the laser beam through optical instruments like microscopes, magnifying glass, telescopes or binoculars.

See 'Electronic/Measuring Devices - Radio Equipment' for radio equipment.

Additional Regulations Cited:

Health Canada Guidance document available at <https://www.canada.ca/en/health-canada/services/health-risks-safety/radiation/everyday-things-emit-radiation/lasers-hand-held-pointers.html>

Target Age

Is there any target age applicable? If so, does it have to be indicated and in which form?

Nil.

Sanctions / Fines

What are the sanctions / fines in case of non conformity ?

See General Infos : https://docs.google.com/document/d/12FUtlIolsHCK_c79pKmKcE6vTSH4z563/edit?usp=sharing&oid=108158560944877852516&rtpof=true&sd=true.

For practical information see : <https://docs.google.com/document/d/1wyEHX4rnhygCPYlbtvzQFRFdD-KgcUF2bQHEk5-u02O4/edit?tab=t.0>

See "Electronic/Measuring Devices - Chargers" subcategory.

See 'Electronic/Measuring Devices - Radio Equipment' for radio equipment.

Recycling - Eco taxes

Which regulations concerning ecodesign and recycling apply to this product? Are there any ecotaxes applicable to this category of product?

As mentioned above, In Nova Scotia and Prince Edward Island, the brand name, image or logo must be clearly affixed in plain view on electronic products under the Solid Waste-Resource Management Regulations, available at: <http://novascotia.ca/just/regulations/REGS/envsolid.htm>.

Also as mentioned above, the Energy Efficiency Regulations, available at <http://laws-lois.justice.gc.ca/PDF/SOR-94-651.pdf> provides labelling requirements.

Any environmental statements that are voluntarily included should comply with the Competition Bureau's Environmental Claims: A Guide for Industry and Advertisers guide, available at: <http://www.competitionbureau.gc.ca/eic/site/cb-bc.nsf/eng/02701.html> to ensure the statement is not considered false or misleading.

Additionally, as mentioned above, if an item is treated with a product subject to the Pest Control Products Act, available at <http://laws-lois.justice.gc.ca/PDF/P-9.01.pdf>, the label must comply with the requirements of the Pest Control Products Regulations, available at: <http://laws-lois.justice.gc.ca/PDF/SOR-2006-124.pdf>.

Labelling

What are the mandatory labellings to put on the product or on the packaging regarding the environmental rules ?

Technical rules / Standards

General safety requirements

What are the general safety requirements ? Does a risk assessment have to be conducted ? If yes, does it concern specific risk ?

See General Infos : https://docs.google.com/document/d/1kx_ngCLpSWWq3uj-Cd6W5tuH75yN-VnV/edit

See "Electronic/Measuring Devices - Chargers" subcategory.

Lasers
Health Canada classifies lasers in accordance with International Electrotechnical Commission (IEC) Standard 60825-1, Class 3B and 4 laser pointers, as classified by this standard, are deemed to constitute a "danger to human health or safety", and are thus forbidden in Canada.

Additional Regulations Cited:
International Electrotechnical Commission (IEC) Standard 60825-1, https://webstore.iec.ch/pre-view/info_iec60825-1%7Bed3.0%7Db.pdf

Mandatory or voluntary standards

Are there some mandatory or voluntary standards applicable ? If yes, which ones ?

Please indicate the reference of the applicable standards

See General Infos : https://docs.google.com/document/d/1kx_ngCLpSWWq3uj-Cd6W5tuH75yN-VnV/edit

See "Electronic/Measuring Devices - Chargers" subcategory.

See 'Electronic/Measuring Devices - Radio Equipment' for radio equipment.

Audio-visual products under the Energy Efficiency Regulations

A video product complies with the energy efficiency standard if it meets that standard when tested in accordance with testing procedures established by CSA C62301 that are applicable to a video product as defined in section 578. A compact audio product must meet the testing standard CSA C62301-11.

Lasers

Health Canada classifies lasers in accordance with International Electrotechnical Commission (IEC) Standard 60825-1. Under this standard, laser products are categorized in the following order, from the lowest to highest potential risk: Class 1, 1M, 2, 2M, 3R, 3B and 4. This standard is the benchmark used by Health Canada to determine whether a laser constitutes the "danger to human health or safety" which Canadian law prohibits.

Hand-held Class 3B and 4 laser pointers are considered a danger to human health or safety under the CCPSA. They are therefore prohibited in Canada

This standard has been integrated into the Canadian Electrical Code, Part II:

Equipment containing a laser system shall be so constructed in such a way that personal protection against laser radiation is provided under normal operating conditions and under fault conditions in accordance with CAN/CSA-E60825-1.

Because the Canadian Electrical Code is legally in force under provincial law, this standard should be treated as having legal effect.

Additional Regulations Cited:

Interference-Causing Equipment Standards, https://www.ic.gc.ca/eic/site/smt-gst.nsf/eng/h_sf06127.html

The International Electrotechnical Commission (IEC) Standard 60825-1 is available at https://webstore.iec.ch/pre-view/info_iec60825-1%7Bed3.0%7Db.pdf

Energy Efficiency Act (S.C. 1992, c. 36), <https://laws-lois.justice.gc.ca/eng/acts/e-6.4/>

- Energy Efficiency Regulations, 2016 (SOR/2016-311), <https://laws-lois.justice.gc.ca/eng/regulations/SOR-2016-311/index.html>

CSA Standard C22.1 - Canadian Electrical Code, part I

CAN/CSA-C22.2 NO. 0-10 (R2015) - Canadian Electrical Code, part II

Physical and mechanicals properties

What are the physical and mechanicals properties required ?

See General Infos : https://docs.google.com/document/d/1kx_ngCLpSWWq3uj-Cd6W5tuH75yN-VnV/edit

See "Electronic/Measuring Devices - Chargers" subcategory.

Video and audio products

The Energy Efficiency Regulations set out specific, required properties for audio-visual equipment. This includes requirements for the standby and 'off' functions.

Lasers

Health Canada classifies lasers in accordance with International Electrotechnical Commission (IEC) Standard 60825-1, Class 3B and 4 laser pointers, as classified by this standard, are deemed to constitute a "danger to human health or safety", and are thus forbidden in Canada.

In Addition, Transport Canada has introduced legislation that prohibits people from owning lasers with more than 1mW of power, which is more onerous than the Health Canada Guidance.

Additional Regulations Cited:

Energy Efficiency Act (S.C. 1992, c. 36), <https://laws-lois.justice.gc.ca/eng/acts/e-6.4/>

- Energy Efficiency Regulations, 2016 (SOR/2016-311), <https://laws-lois.justice.gc.ca/eng/regulations/SOR-2016-311/index.html>

Transport Canada Guidance - Use hand-held lasers legally and safely: <https://www.tc.gc.ca/en/services/transportation-security/aviation/hand-held-lasers-legally-safely.html>

Electrical aspects

What are requirements regarding electrical aspects ?

Inflammability

Are there any specific requirements to ensure inflammability?

Hygiene

What are the rules regarding hygiene ?

Nil.

Radioactivity

What are the rules regarding radioactivity ?

See General Infos : https://docs.google.com/document/d/1kx_ngCLpSWWq3uj-Cd6W5tuH75yN-VnV/edit

See "Electronic/Measuring Devices - Chargers" subcategory.

See 'Electronic/Measuring Devices - Radio Equipment' for radio equipment.

Laser scanners and 'demonstration' lasers are both prescribed products under the Radiation Emitting Devices Regulations, however a video camera equipped with laser likely doesn't fall into these categories. This can be found in Schedule 1 of the Radiation Emitting Devices Regulations.

If product emits radiation, see General Infos and 'Electronic/Measuring Devices - Chargers' subcategory

Radiofrequency (2G,3G,4G,5G, Bluetooth, Ant+, GPS, Wifi...)

What are the rules regarding the radiofrequency?

Products making noise

What are the requirements regarding products making noise ?

Nil.

Chemicals substances

What are the requirements regarding chemicals substances ? Which ones are forbidden ? Limited ? Do we have to clearly indicate all substances that are in the product, or is the indication of major substances enough?"

Packaging requirements

Can you please indicate if there are some requirements regarding the packaging of our products (mainly they are in paper, carton, plastic, textile) ? If yes, please explain them.

Laboratory

In which laboratory can we perform the testing of the product according to the standard?

See General Infos : https://docs.google.com/document/d/1kx_ngCLpSWWq3uj-Cd6W5tuH75yN-VnV/edit

See "Electronic/Measuring Devices - Chargers" subcategory.

See 'Electronic/Measuring Devices - Radio Equipment' for radio equipment.

Sanctions / Fines

What are the sanctions / fines in case of non conformity ?

Comments

Comments

Nil.

Certifications / Registrations

Certifications or registrations

Are there some certifications or registrations applicable to the product ?

Laboratory

In case of mandatory certification/ registration that we must follow please precise the name and address of any laboratories where we can conduct them

Comments

Comments

See 'Electronic/Measuring Devices - Radio Equipment' for radio equipment.

Conformity documents

Documents

What are the conformity documents ? Can you please list them ?

Format

Does it exist a specific format for the conformity documents ? If yes, can you please provide us an example in english ?

Nil.

Comments

Comments

Nil.

Importation rules

General rules

What are the general rules in order to import the product ?

Documents

What are the required documents ?

Time period

In which time period may we obtain the right to import ?

Administration

What is the administration in charge of importations ? Name and address ?

Comments

Comments

Inspection of the product

Inspection method

Does it exist an inspection procedure applicable to the product ? If yes, which administration is in charge of ? Can you please describe the procedure ?

Commercialization rules

Notification / Declaration

What are the general rules in order to commercialize a product ?
Is there a notification / declaration to do ?

Nil.

Documents

What are the required documents ?

Nil.

Delay

What is the delay to obtain the right to commercialize ?

Nil.

Display in store

Is there some specific rules on the way to display the product in store ?

Display on internet

Is there some specific mentions to display the product on internet ?

Information to consumers

Do some specific information to have be given to consumers when the product is placed on the market ?

Comments

Comments

Nil.

Administration

What is the administration in charge of commercialization ? Name and address ?
