Product's definition

Category

In which category the product is classified ?

"Electrical and electronic equipment" means equipment which is dependent on electric currents or electromagnetic fields in order to work properly and equipment for the generation, transfer and measurement of such currents and fields and designed for use with a voltage rating not exceeding 1 000 volts for alternating current and 1 500 volts for direct current.

For product with radiocommunication function (regardless of the frequency) and for products with a bluetooth function or similar), please refer to the card "Electronic equipment using bluetooth".

Definition

What is the exact definition of the product ?

And if it exists, what is the interpretation of the authorities regarding it ?

If a battery or accumulator is included in your product, please refer also to the card "Battery and Accumulator".

For product with radiocommunication function (regardless of the frequency) and for products with a bluetooth function or similar), please refer to the card "Electronic equipment using bluetooth".

Labelling

Language

In which language must the information on the product or on the packaging be indicated? If English is sufficient please indicate NA.

The labelling must be translated in every language of each retail country.

Mandatory labelling on product

What are the mandatory labelling on the product ?

- CE marking is compulsory.

The CE marking shall be affixed visibly, legibly and indelibly on the product. Where that is not possible or not warranted on account of the nature of the product, it shall be affixed to the packaging and to the notice.

In the case where a notified body has been requested, its identification number must be at the same height as the CE marking.

So as to obtain the CE marking you have to fill out the CE conformity declaration. [Here an example](#)

- Each product shall identified in terms of type, batch, serial number or any other product information allowing for the identification of the product

- Each product shall be accompanied by the name and address of the manufacturer and, if he is not established within the Community, the name and address of his authorised representative or of the person in the Community responsible for placing the apparatus on the Community market.

Name and address : DECATHLON, 4 bd de Mons, 59665 VILLENEUVE D'ASCQ

+ commercial Brand

- The manufacturer shall provide information on any specific precautions that must be taken when the apparatus is assembled, installed, maintained or used (manual user). The information must be in an understandable language.

You have to write the pictogram on below:

The symbol indicating separate collection for EEE consists of the crossed-out wheeled bin, as shown below. The symbol must be printed visibly, legibly and indelibly.

This following pictogram means that the company participates in a system for waste recovery.

For the music player which are intended to the french market the manufacturer has the obligation to write on the packaging the sentence under the following pictogram (minimum height of 8 mm):

"At full power, prolonged listening to the music player may damage the ear of the user".

There is an obligation to inform the consumer about the specific absorption rate. The SAR value must be visible to the consumer. The obligation now covers all devices "whose transmitting power exceeds 20 mW and which can reasonably be expected to be used at a distance of no more than 20 cm from the head or any other part of the human body". For the SAR to the "limb" the maximum limit set at 4 W/kg against 2 W/kg for the head and trunk.

Manufacturers shall indicate:

- their name, company name or registered trademark,
- postal (4 Boulevard de Mons, 59650, Villeneuve-D'Ascq) and electronic address (csr.decathlon.com/product-safety)

If, due to the size of the product, it is not possible to indicate all this information, it will be necessary to indicate it on the packaging and instructions.

Mandatory labelling on packaging

What are the mandatory labelling on the packaging ?

- CE marking is compulsory.

The CE marking shall be affixed visibly, legibly and indelibly on the product. Where that is not possible or not warranted on account of the nature of the product, it shall be affixed to the packaging and to the notice.

In the case where a notified body has been requested, its identification number must be at the same height as the CE marking.

So as to obtain the CE marking you have to fill out the CE conformity declaration. [Here an example](#)

- Each product shall identified in terms of type, batch, serial number or any other product information allowing for the identification of the product
- Each product shall be accompanied by the name and address of the manufacturer and, if he is not established within the Community, the name and address of his authorised representative or of the person in the Community responsible for placing the apparatus on the Community market.

Name and address : DECATHLON, 4 bd de Mons, 59665 VILLENEUVE D'ASCQ

+ commercial Brand

If the size or nature of radio equipment does not allow to put it on the product directly, this information shall be indicated on its packaging, or in a document accompanying the radio equipment.

- The manufacturer shall provide information on any specific precautions that must be taken when the apparatus is assembled, installed, maintained or used (manual user). The information must be in an understandable language.

You have to write the pictogram on below:

The symbol indicating separate collection for EEE consists of the crossed-out wheeled bin. The symbol must be printed visibly, legibly and indelibly.

The "crossed-out bin" symbol means that this product and the batteries it contains must not be disposed of in household waste. They must be separated and recycled specially. Take the batteries and unusable electronic products to an authorised collection area for recycling. Recycling your electronic waste in this way will protect the environment and your health.

The previous sentence that explain the signification of the pictogram is not compulsory on the packaging if the product has a notice, otherwise the sentence must be written under the symbol so as to explain the meaning.

This following pictogram means that the company participates in a system for waste recovery.

For the music player which are intended to the French market the manufacturer has the obligation to write on the packaging the sentence under the following pictogram (minimum height of 8 mm):

"At full power, prolonged listening to the music player may damage the ear of the user".

There is an obligation to inform the consumer about the specific absorption rate. The SAR value must be visible to the consumer. The obligation now covers all devices "whose transmitting power exceeds 20 mW and which can reasonably be expected to be used at a distance of no more than 20 cm from the head or any other part of the human body". For the SAR to the "limb" the maximum limit is set at 4 W/kg against 2 W/kg for the head and trunk.

Regulation (EU) 2023/988 about General Product Safety

Manufacturers shall indicate:

- their name, company name or registered trademark,
- postal (4 Boulevard de Mons, 59650, Villeneuve-D'Ascq) and electronic address (csr.decathlon.com/product-safety)

The rest of the information to be included in the packaging is available [here](#)

Mandatory labelling on the instructions manual

What are the mandatory labelling on the instructions manual (if one is required) ?
In which format, do we have to deliver the instruction manual to our customers ?

- CE marking is compulsory.

The CE marking shall be affixed visibly, legibly and indelibly on the product. Where that is not possible or not warranted on account of the nature of the product, it shall be affixed to the packaging and to the notice.

In the case where a notified body has been requested, its identification number must be at the same height as the CE marking.

So as to obtain the CE marking you have to fill out the CE conformity declaration. [Here an example](#)

- Each product shall be identified in terms of type, batch, serial number or any other product information allowing for the identification of the product

- Each product shall be accompanied by the name and address of the manufacturer and, if he is not established within the Community, the name and address of his authorised representative or of the person in the Community responsible for placing the apparatus on the Community market.

Name and address : DECATHLON, 4 bd de Mons, 59665 VILLENEUVE D'ASCQ

+ commercial Brand

If the size or nature of radio equipment does not allow to put it on the product directly, this information shall be indicated on its packaging, or in a document accompanying the radio equipment.

- The manufacturer shall provide information on any specific precautions that must be taken when the apparatus is assembled, installed, maintained or used (manual user). The information must be in an understandable language.

You have to write the pictogram on below:

The symbol indicating separate collection for EEE consists of the crossed-out wheeled bin. The symbol must be printed visibly, legibly and indelibly.

The "crossed-out bin" symbol means that this product and the batteries it contains must not be disposed of in household waste. They must be separated and recycled specially. Take the batteries and unusable electronic products to an authorised collection area for recycling. Recycling your electronic waste in this way will protect the environment and your health.

The previous sentence that explain the signification of the pictogram is not compulsory on the packaging if the product has a notice, otherwise the sentence must be written under the symbol so as to explain the meaning.

This following pictogram means that the company participates in a system for waste recovery.

For the music player which are intended to the French market the manufacturer has the obligation to write on the notice the sentence under the following pictogram (minimum height of 8 mm):

"At full power, prolonged listening to the music player may damage the ear of the user".

The SAR value must be visible to the consumer.

For France, SAR value must be indicated in the instructions manual if the transmitting power is greater than 20 mW and of which it is reasonably foreseeable that they will be used at a distance not exceeding 20 cm from the head or any other part of the human body. [Information](#) relating to the safety of users and non-users and [information](#) on the behaviour to be adopted to reduce exposure to radiation emitted by radio equipment must be added.

For the SAR to the "limb" the maximum limit set at 4 W/kg against 2 W/kg for the head and trunk.

Warnings - General ones

Are general warnings required ? If yes, which ones ?

NA

Warnings - Specific ones

Are specific warnings required ? If yes which ones ?

NA

Target Age

Is there any target age applicable? If so, does it have to be indicated and in which form?

NA

Sanctions / Fines

What are the sanctions / fines in case of non conformity ?

Each Member States shall lay down the applicable penalties in case of infringement of the adopted national provisions in accordance with this Directive.

Comments

NA

Environment

Recycling - Eco taxes

Which regulations concerning ecodesign and recycling apply to this product? Are there any ecotaxes applicable to this category of product?

There is an eco tax for WEEE : the symbol indicating separate collection for EEE consists of the crossed-out wheeled bin, as shown below. The symbol must be printed visibly, legibly and indelibly.

NB : In the EU, the green dot is not applicable anymore since the first of January 2021, except for Spain (managed locally).

Labelling

What are the mandatory labellings to put on the product or on the packaging regarding the environmental rules ?

=> Spain: Royal Decree 1055/2022 ; <https://www.ecoembesthecircularcampus.com/actua/moviliza/simbolo-de-reciclaje/>

=> Italy: art. 219, paragraph 5, Italian Legislative Decree no. 152/2006 - Consolidated Environmental Act

=> Some specific rules for the EU: <https://drive.google.com/file/d/1fL9au8WyZtj7qwsker7RloeFQilZfMb3/view?usp=sharing>

Technical rules / Standards

General safety requirements

What are the general safety requirements ? Does a risk assessment have to be conducted ? If yes, does it concern specific risk ?

2001/95/EC Directive (General Safety Requirements), French Decree 2007-665

This Directive defines the General Safety Requirements.

Producers shall be obliged to place only safe products on the market. A product shall be deemed safe, as far as the aspects covered by the relevant national legislation are concerned, when, in the absence of specific Community provisions governing the safety of the product in question, it conforms to the specific rules of national law of the Member State in whose territory the product is marketed, such rules being drawn up in conformity with the Treaty and laying down the health and safety requirements which the product must satisfy in order to be marketed.

Your product could be concerned by the French Decree 2007-665 about laser, to refer to the [following document](#) so as to know if your product fall under the Decree.

Regulation (EU) 2023/988 about General Product Safety

Before placing a product on the market, the manufacturers must carry out an internal risk analysis to be included in the technical documentation. Where products are subject to specific safety requirements imposed by Union law, this obligation applies only to those aspects and risks or categories of risks which are not covered by those requirements.

Applicable for all new model codes placed on the European market from 13 December 2024.

You could find more information and the template to the internal risk analysis in the Quality website [HERE](#)

Mandatory or voluntary standards

Are there some mandatory or voluntary standards applicable ? If yes, which ones ?

Please indicate the reference of the applicable standards

Under EMC Directive, the equipment must be designed and manufactured in accordance with the state of the art to ensure:

a) that the electromagnetic disturbances produced do not exceed the level beyond which radio and telecommunications equipment or other equipment can not operate as intended; and

(b) have a level of immunity to the electromagnetic disturbances to be expected in the intended use that will enable them to operate without unacceptable degradation of that use.

The conformity of the equipment with the harmonized standards gives rise to a presumption of conformity with the essential requirements. The list of the harmonized standard :

[Here](#)

But if the standards used are not harmonized standards or these standards are used only partially, a notified body could be used.

Under ROHS II Directive on the restriction of the use of certain hazardous substances in electrical and electronic equipment
- please see the point about chemical substances

Under SAR rules

Si Emission power > 20mW submitted to SAR (Self Absorption Rate) test. DAS measurement shall be <2W/Kg (head) <4W/kg (body).

Physical and mechanicals properties

What are the physical and mechanicals properties required ?

ESPR REGULATION

The Ecodesign for Sustainable Products Regulation (ESPR) entered into force on 18 July 2024 to significantly improve the circularity, energy performance, and other environmental sustainability aspects of products placed on the EU market. It replaces the Ecodesign Directive 2009/125/EC and enables the setting of performance and information conditions – known as ‘ecodesign requirements’ – for almost all categories of physical goods (with some exceptions, such as food and feed). Please note that it is a framework legislation, meaning concrete product rules will be decided progressively over time, on a product-by-product basis, or horizontally, on the basis of groups of products with similar characteristics. For more information, please consult the website of the European Commission [here](#) and the applicable delegated acts.

Electrical aspects

What are requirements regarding electrical aspects ?

NA

Inflammability

Are there any specific requirements to ensure inflammability?

NA

Hygiene

What are the rules regarding hygiene ?

NA

Radioactivity

What are the rules regarding radioactivity ?

NA

Radiofrequency (2G,3G,4G,5G, Bluetooth, Ant+, GPS, Wifi...)

What are the rules regarding the radiofrequency?

Products making noise

What are the requirements regarding products making noise ?

Music players or listening devices intended to the French market may not exceed a maximum sound output power corresponding to a sound pressure of 100 dB.

Si Emission power > 20mW submitted to SAR (Self Absorption Rate) test. DAS measurement shall be <2W/Kg (head) <4W/kg (body).

Chemicals substances

What are the requirements regarding chemicals substances ? Which ones are forbidden ? Limited ? Do we have to clearly indicate all substances that are in the product, or is the indication of major substances enough?"

Restricted substances and maximum concentration values tolerated by weight in homogeneous materials.

Lead (0,1 %)

Mercury (0,1 %)

Cadmium (0,01 %)

Hexavalent chromium (0,1 %)

Polybrominated biphenyls (PBB) (0,1 %)

Polybrominated diphenyl ethers (PBDE) (0,1 %)

+ 4 additionnal substances with RoHS III (applicable middle 2019)

Bis(2-Ethylhexyl) phthalate (DEHP) (0,1 %)

Benzyl butyl phthalate (BBP) (0,1 %)

Dibutyl phthalate (DBP) (0,1 %)

Diisobutyl phthalate (DIBP) (0,1 %)

For all products:

INFORMATION REGARDING CHEMICAL SUBSTANCES

The products shall comply with all applicable regulations in the EU, including REACH regulation (notably annexes XIV and XVII) and CLP regulation regarding the limitation and/or ban of specific substances.

The products shall, when applicable, comply with specific bans set out by EU regulations (eg. PFHxA, lead, bisphenols, ...). Please refer to the chemical regulations file (link [HERE](#)) mapping all applicable regulations in the EU, as well as substances of very high concern.

The products shall comply with our internal commitments, formalized in our [Chemical Management Policy](#), including the general and/or categorical restricted substances lists. Please ensure the supplier of these products has duly signed the aforementioned documents before production.

For more information about chemical test to be done, please refer to the [General Guidelines for Testing](#).

Packaging requirements

Can you please indicate if there are some requirements regarding the packaging of our products (mainly they are in paper, carton, plastic, textile) ? If yes, please explain them.

NA

Laboratory

In which laboratory can we perform the testing of the product according to the standard?

Under 2011/65/EU Directive (RoHS II)

You have to conduct a self certification proceedings so as to obtain a test report that respect the threshold fixed in the Directive.

Under 2014/30/EU Directive (EMC)

The conformity of the equipment with the harmonized standards gives rise to a presumption of conformity with the essential requirements. But if the standards used are not harmonized standards or these standards are used only partially, a notified body could be used.

List of the Notified body :[here](#)

Sanctions / Fines

What are the sanctions / fines in case of non conformity ?

Each Member States shall lay down the applicable penalties in case of infringement of the adopted national provisions in accordance with this Directive.

Comments

Comments

If a battery or accumulator is including in your product, please refer also to the card "Battery and accumulator"

If the product has a radiocommunication function (regardless of the frequency) and/or a bluetooth function or similar), please refer to the card "Electronic equipment using bluetooth".

Certifications / Registrations

Certifications or registrations

Are there some certifications or registrations applicable to the product ?

Each producer shall be registered.

Registration is subject to the same requirements procedural steps in each Member State

Laboratory

In case of mandatory certification/ registration that we must follow please precise the name and address of any laboratories where we can conduct them

If the product has a radiocommunication function (regardless of the frequency) and/or a bluetooth function or similar), please refer to the card "Electronic equipment using bluetooth".

Importation rules

General rules

What are the general rules in order to import the product ?

Regulation (EU) 2023/988 about General Product Safety

When a product is imported from a country outside the EU (invoiced from a country outside the EU), Decathlon assumes the following obligations as importer:

- Obligation to ensure that the product is compliant (Technical documentation including Risk analysis and legal marking).
- Identification of Decathlon as importer on the legal marking of the product.
- Immediately inform the manufacturer of a dangerous product and check the information available on Safety Business Gateway.

Commercialization rules

Notification / Declaration

What are the general rules in order to comercialize a product ?
Is there a notification / declaration to do ?

DEFORESTATION REGULATION

The regulation fighting deforestation and forest degradation (RDUE - text available [here](#)) requires operators wishing to place on the EU market or export from the EU wood, rubber, cattle, coffee, cocoa, palm oil and soy or products based on these materials to file a due diligence declaration.

In order to file this declaration, operators need to collect geolocation of extraction / production plots and the date or period of extraction, prove that the product is 0 deforestation and comply with local regulations (human rights, environment, etc.).

In order to know if you're concerned by this regulation, please check your HS Code ([Annex 1](#)) and/or contact the product conformity team.

Display in store

Is there some specific rules on the way to display the product in store ?

In France , since 2006, the stores have the obligation (Decree 2005-829 of 20 July 2005 on the composition of electrical and electronic equipment and the disposal of waste from this equipment) to take back the waste of electrical equipment and consumer electronics (WEEE) when purchasing new appliances of the same type.

Display on internet

Is there some specific mentions to display the product on internet ?

Regulation (EU) 2023/988 about General Product Safety

Any operator must guarantee that any warning or information concerning safety which must be affixed to the product or to the packaging or to appear in an accompanying document will be available online.

AGEC INFORMATION

In addition to prohibiting a product or packaging that carries the mentions “biodegradable” or “environmentally friendly”, Article 13 of the French AGEC law provides for an obligation to inform consumers about specific environmental qualities and characteristics of some products and their packaging (described in Article L541-9-1 of the French Code of Environment - available [here](#)). The Decree 2022-748 (published on April 29, 2022 - available [here](#)) and supplemented by an official FAQ (latest version published in October 2023 - available [here](#)), specifies the scope of this obligation. It lists the requirements per type of concerned item, and provides that all the information must be available in a digital format for 2 years after the last unit of the product concerned is placed on the market, accessible without charge at the time of purchase, and reusable in a way that allows aggregation.

Information to consumers

Do some specific information to have be given to consumers when the product is placed on the market ?
